Profile

Hello! I am a computer science student working on my bachelor's degree. I've dabbled in most of the popular programming languages, but find the scripting languages especially easy and natural for me to code in.

I primarily work with serverless solutions on AWS Cloud, utilizing React.js and Typescript, both frontend and Node.js backend. Other than that, I also have some experience with Google Cloud and Firebase/Firestore.

I consider myself very adaptable, always eager and open to working with, and learning new languages and tech stacks. Feel free to checkout my LinkedIn for a more complete list of all the languages and stacks I've worked with.

Education

Bachelor's Degree,
Faculty of Computer Science and Engineering
09/2017 — present | Skopje, North Macedonia

Professional Experience

Miracle Mill, *Software Engineer*
01/2022 — present | Skopje, North Macedonia
